HOW DOES IT WORK?

"As music therapists, we come across more and more people who prefer a creative type of therapy that allows them to bypass rational thinking. That's where creative music therapy and Guided Imagery and Music (GIM, a powerful music- and imagery-centred psychotherapy) are very effective says Kobie. Music therapy can have massive impact because of how music affects the brain. "Music is a 'whole brain' phenomenon which means your entire brain is active and engaged," says L. "Music is a system where the are translated into sound form patterns and structure (songs), we have an emotional, mental, and physical response to these structures, and meaning to them."

Through improvisation, songwriting, lyrics, movement, and listening, you communicate feeling, giving insight into your Music therapy listen to the relational engages v

The image shows three black pens arranged diagonally on a light pink background. The pen on the left is the M-42 Intel, the middle one is the M-43 Puma, and the one on the right is the M-44 Allen Solly. Each pen has a silver-colored clip. A pink cylindrical object is visible on the right edge of the frame.

A photograph of two pens, M-62 and M-63, resting on a spiral notebook. The pen on the left is black with silver-colored accents and a silver-colored logo. The pen on the right is black with gold-colored accents and a gold-colored logo. Both pens have a textured barrel and a smooth, tapered tip. The background is a light gray surface with a spiral notebook and a pink folder visible.
